

FENWICK

**PARENTAL PERMISSION FORM**

**FOR**

**SIX SUBJECTS**

We have discussed next year's academic schedule with our child and we realize that the counselor has advised concentrating on improving the overall grade average rather than electing a six course load.

We understand that a request to take six subjects for the school year is an exception to the prerequisite of a 3.00 cumulative average for a science course (or a Student Services exemption for a non-science course). We are aware that by selecting a heavier academic load the student runs the risk of achieving lower grades in each class rather than just in the additional class.

We believe, however, that a positive attitude toward studies is such that the student should be given the chance to take the extra course.
